

Smartlips

Combined Photometer, Sound Level Meter and off-screen A/V sync meter.

- **Measure lip sync directly off screen using blip and flash.**
- **Align loudspeakers and displays to International Standards.**
- Sound Level Meter covering 50 to 130dBc (slow), for multichannel audio line up and acoustics tests.
- Photometer, reads 0-1999 candelas per m² for display luminance set-up
- A/V sync reads audio 0-1 sec early or late, reading directly from any blip and flash (SMPTE header, VT clock, TSG DVD test disc or EBU Tech 3305 signal).
- Compact, light, rugged, and simple to use. Big, backlit, single range, un-ambiguous display – ideal for use in dark viewing areas.
- Matching flash and blip generator for direct through camera testing available.

.....

Smartlips Generator

Blip and Flash generator for Camera testing.

- For Studio use:-

and just as useful on Location:-

- Peak Luminance flash of over 1k Cd per sq metre, with 80dB SPL 2kHz audio blip at 1 metre distance.
- 2.2 sec period, 1: 80 Duty cycle.
- 25 days continuous operation battery life using standard alkaline LR6/PP3 battery.
